Top Skills

React.js
JavaScript
HTML

Languages

Hindi (Elementary)
Telugu (Native or Bilingual)
English (Limited Working)

Certifications

JavaScript (Basic) Certificate
AWS Academy Graduate - AWS Academy Machine Learning Foundations
Full Stack Web Application Development with Node JS
LangChain
PCAP: Programming Essentials in Python

Joel Henry Yellamelli

Fullstack AI Engineer · React · Next.js · FastAPI · LangChain |
Building AI-native products |
Hyderabad, Telangana, India

Summary

I am Joel Henry Working as FullStack Developer at Mondee. I am Very Enthusiastic to Learn New Technologies and Implement them to Create More Optimised and Useful Products :• Languages: JavaScript, Typescript, Python• Front-End Frameworks: HTML5, React, Next js, Svelte• Css Frameworks: CSS3 , Bootstrap, Tailwind CSS, Material UI, Shadcn/ui• Back-End : Express JS, Flask, Django, Fast API• AI/ML : Statistical ML, LangChain, RAG, Mlflow• Databases : PostgreSQL ,MySQL , MongoDB • Baas : Firebase , Supabase• Web-Scraping: Beautiful Soup, Scrapy • Android Dev : Java , React Native• CMS: WordPress• Cloud : AWS (EC2, S3, Lambda, CloudFormation, IAM, CloudWatch, AWS Event Bridge)• Devops : Docker, Kubernetes, Terraform• Testing Frameworks: Jest(Unit), Supertest, Postman (API), Cypress, Playwright (E2E), StoryBook (Visual), BrowserStack(CBT)

Experience

Mondee
Full Stack Developer
May 2026 - Present (6 months)
Hyderabad

: Mirae

- Developed scalable full-stack applications using React, FastAPI, Python, MongoDB, Redis, TanStack Query, Zustand, React Hook Form, Zod, JWT, and Google/Microsoft SSO, following a clean architecture with asynchronous APIs and optimized database operations.

One Convergence

3 years 1 month

Software Engineer
June 2024 - April 2026 (1 year 11 months)
Hyderabad

: GoodDoc

- Worked collaboratively to customize a WordPress website, using PHP, HTML, and CSS to modify the template and align it with client specifications.
- Developed web scraping solutions using Scrapy and Playwright to extract relevant data from the website, ensuring accurate and efficient data retrieval.
- Implemented end-to-end testing scripts with Cypress to ensure functionality and performance of the application.

: Wordpress, html, css, php, scrapy (with playwright) - python , cypress - JavaScript

: AskX

- Architected a 3-service microservices platform for AI-powered HR automation using Python, FastAPI, and Django.
- Built and maintained REST APIs using Django REST Framework (DRF), implementing Django ORM for database management, migrations, and admin interface.
- Implemented a multi-agent AI system with specialized agents leveraging LLM orchestration, RAG, and FAISS vector search for HR policy queries.
- Designed extensible platform abstraction layer for Google Chat, Slack, and Teams, reducing code duplication by 81%.

Software Engineer Intern

April 2023 - May 2024 (1 year 2 months)

Hyderabad, Telangana, India

: GPTfu Website

- Collaborated on customizing a WordPress-based website, utilizing PHP, HTML, and CSS to tailor the template to meet client requirements.
- Modified backend functionalities of the WordPress site using MySQL, enhancing performance and functionality.
- Contributed to the development of React components within the project, adding versatility to skill set and contributing to a dynamic user interface.

: Wordpress,php,html,css,jquery, bootstrap,MySQL, React js

: HappiCards Website

- Assumed a pivotal role in both frontend and backend development phases of a Python Flask-based web application.
- Leveraged Jinja templating, HTML, CSS, JavaScript, and Bootstrap to meticulously craft a seamless user interface, ensuring an optimal user experience.
- Implemented PostgreSQL to ensure efficient and robust data handling and management within the application.
- Gained valuable experience in containerization using Docker, streamlining deployment processes and enabling seamless scaling of the application.
- Worked extensively with AWS services, including EC2 instances and S3 buckets, gaining familiarity with cloud infrastructure components and deployment practices.
- Worked on Performance Optimisation of website using Google Lighthouse, Page speed insights, Browserstack(cloud based live testing)

: html5, css3, js, jinja2, bootstrap, python, flask, postgresql, docker, aws

DKube

Software Engineer

June 2024 - April 2026 (1 year 11 months)

Hyderabad

: Dkubex

- Built custom React components with Shadcn UI/Tailwind CSS and tested with Storybook.
- Refactored a Next.js app to enhance efficiency by streamlining features.
- Developed a robust FastAPI backend for new feature integration.
- Added Playwright for UI testing and improved usability.
- Enhanced and extended a legacy Svelte-based project by implementing new features and improving existing functionality
- Focused on frontend and UI development.

: React js, tailwind css, shadcn ui, storybook, FastAPI, Playwright, Next js, Svelte, Redux toolkit

: AI Agentic Initiative (By RaiDDers- Dkubex internal Team)

- Developed a responsive and intuitive UI for the Agentic Platform using Next with TypeScript and Tailwind CSS.

- Integrated agentic actions with the backend services built in FastAPI for seamless user interaction and automation.

: Next, Typescript, Tailwind CSS, Redux Toolkit

: Kasu.AI

- Built custom Next components with Shadcn UI/Tailwind CSS and tested with Storybook
- Added API integrations with Backend Using Tanstack Query
- Added User Management for RBAC using Better Auth

: Next, Typescript, Tailwind CSS, Shadcn, BetterAuth, TanStackQuery

: DocMind

- Developed backend APIs in Go and integrated them with a Next.js (TypeScript) frontend, ensuring efficient data flow and reliable service communication.
- Deployed and managed microservices architecture using RayServe, Kubernetes, and Helm for scalable and fault-tolerant workloads.
- Improved OCR extraction performance and accuracy through ML-based optimization techniques.
- Implemented Infrastructure as Code using Terraform and AWS CloudFormation, and automated cost-efficient scaling using EC2, Lambda, S3, and EventBridge.

: Next, Typescript, Tailwind CSS, Redux Toolkit, Docker, Kubernetes, Terraform, AWS (EC2, S3, Lambda, CloudFormation, EventBridge), Go

StudyOwl

Full Stack Web Development Intern

September 2022 - November 2022 (3 months)

Bengaluru, Karnataka, India

- As a full stack web development intern at Study Owl, I worked on developing an e-commerce application using Ejs, Express.js, Node.js, and Firebase as a backend-as-a-service platform.
- Throughout my internship, I utilized my skills in both front-end and back-end development to create a seamless user experience for the e-commerce application. I leveraged Ejs, a templating language, to create dynamic web pages, and used Express.js to build the server-side logic and handle HTTP requests. Node.js was used to execute the server-side code.
- To store data and handle authentication, I utilized Firebase, a cloud-based backend-as-a-service platform. This allowed me to focus on the core

functionalities of the application without worrying about server management or database configuration.

•Overall, my internship at Study Owl allowed me to gain valuable experience in full stack web development and develop a real-world e-commerce application using industry-standard technologies.

: Express Js, Embedded JavaScript, Jest, Supertest, Husky, Postman, PostgreSQL, Firebase

Education

Vishnu Institute of Technology (Autonomous)

Bachelor of Technology - BTech, Artificial intelligence and data science

· (June 2020 - April 2024)

Sri Chaitanya College of Education

Intermediate, MPC · (June 2018 - March 2020)

Andhra University

Master of Business Administration · (July 2025 - June 2027)
